There are few data concerning the use of monotherapy in depressed elderly patients. To assess the efficacy and tolerability of clomipramine in this patient population, the authors conducted a double-blind, placebo-controlled trial in 77 severely depressed, elderly outpatients randomly assigned to clomipramine or placebo. Mood, global functioning, and cognitive status were assessed initially and at 6-week intervals. The dose of clomipramine was gradually increased over 5 to 6 weeks to steady-state levels. All measures of mood, global functioning, and cognitive status were evaluated at each dose level. After 33 weeks of treatment, clomipramine was significantly better than placebo on several measures of depression, global functioning, and cognitive status. Clomipramine was well tolerated with no significant adverse effects on underlying function. Clomipramine appears to be a safe and effective treatment for depressed elderly patients.Employment search Search By Sector Employment by

You won't see it in the final form (I can't as the final print version doesn't have the same dimensions) but it's a work that over the years has significantly improved. It is a true labour of love! It is the combined work of Nina Cicarelli/Idstudio/MoonArc and Jason Thompson/Magic Moon Studios. If you want to really appreciate the technical level of Max McCall's art you have to see it!Q: SharePoint site as login-friendly Business Portal I'm looking for ways of providing links that point to a SP site but have the slick modern UI of the Business Pannels instead of the classic portals page. Like we have SharePoint Business Pannels but the content is SharePoint sites. Has anyone suggested or worked on a project in this direction? A: I believe that this is a bit of a contradiction in the goal of these sites, as you say. If you were looking to make a "business portal" which is a fresh redesign of the classic OOB SharePoint portal, then these look very promising. Which end-user sees what? I believe that this one seems to fit with your goals, sharepointhub.com - This is an open source customization that gives you a portal-like UI but backed by a SharePoint site and then I believe it displays a SP webparts site in the left pane (similar to the diagram).
